Cape care instructions

Brights collection 2018 / 19 Washable Capes

Pink Freud, Rubber Duckie, Coat D'Azur

Cleaning

- The cape is machine washable at 30°C.
 - The outer is made from cotton with a specially developed blend of oils and waxes. Use non-biological detergent and wash on cool only. Harsh detergents will strip the waterproofing.
 - Dry in a ventilated area away from direct heat, ie not on a radiator.

Storage

- Store your cape in a ventilated area. Back of cupboards or against external walls tends to encourage mould growth, as with any natural fabric.
 - Long periods of folding will crease the cape but creases will drop out on wearing.
 - Wearing or gently warming with a hairdryer will reshape the cape.

Reproofing

- We recommend reproofing annually, however the need for this will depend on amount of wear.
 - On the advice of British Millerain, we recommend using Nikwax Reproofing Spray.
